TECHNICAL SPECIFICATIONS

DURABLE FIRE SAFE BIN

30L

FEATURES

- Manufactured from high-grade scratch-proof steel and finished off with an epoxy resin coating, these fire safe bins have gone through thorough testing and TUV certified for preventative fire protection.
- An ideal choice for busy offices, industrial facilities and fire risk zones, these bins offer a self-extinguishing lid with a round aperture and are designed to shut off the oxygen supply before the flames erupt into something more serious.

SPECIFICATIONS

- TUV Certified.
- Epoxy resin coated.
- Manufactured from 60% recycled material.
- 100% Recyclable at end of life.
- Self extinguishing.
