TRIPLE COMPARTMENT CUP-SHAPED RECYCLING BIN

100L

FEATURES

- The three compartments are made up of two sections that can be fitted with bags to collect cups and lids, and a third; a tube to collect liquids. This tube is easily lifted from the unit for emptying, and made from high impact polystyrene, ensuring protection against leaks and damages.
- There are a selection of customisation options available, including an optional lift up lid, a range of colours for the base, and custom artwork. The lid of the bin is easy to lift off for changing the liners and emptying the tube, and the base is made from a wipe-clean surface, ensuring easy maintenance without compromising on quality.
